

# German ODA contributes to achieving international climate-financing goals

Ambition: From 2020 climate finance at least **4 Bn. EUR per Year. Now approx. 5.6Bn €**

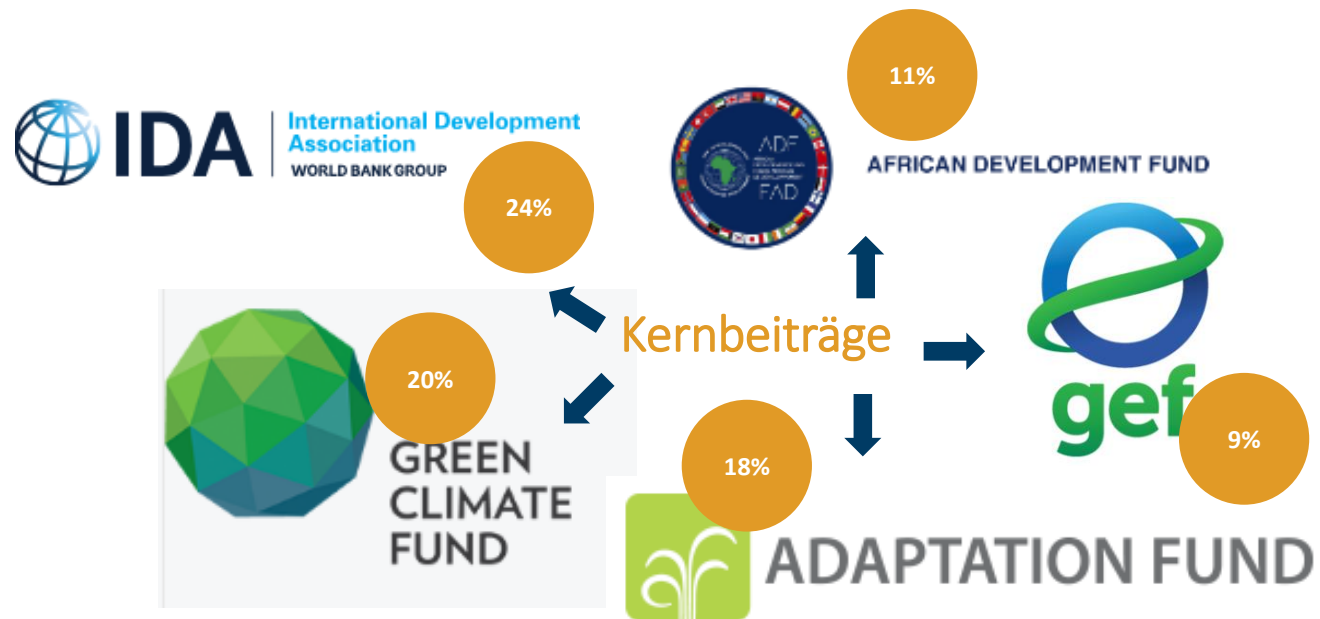

- **>17,5 Bn. USD adaptation-finance ODA (2011-20)**;
- Increasing funding for dealing with Losses & Damages, e.g. climate risk insurance

Climate-ODA compared to all ODA  
(in Million USD)

## Significant contributions through Multilaterals

- Increasing **financial significance** of multilateral contributions;
- 2,5 Bn. USD **core contributions**; 2,4 Bn. USD **earmarked contributions** (2011 bis 2020).

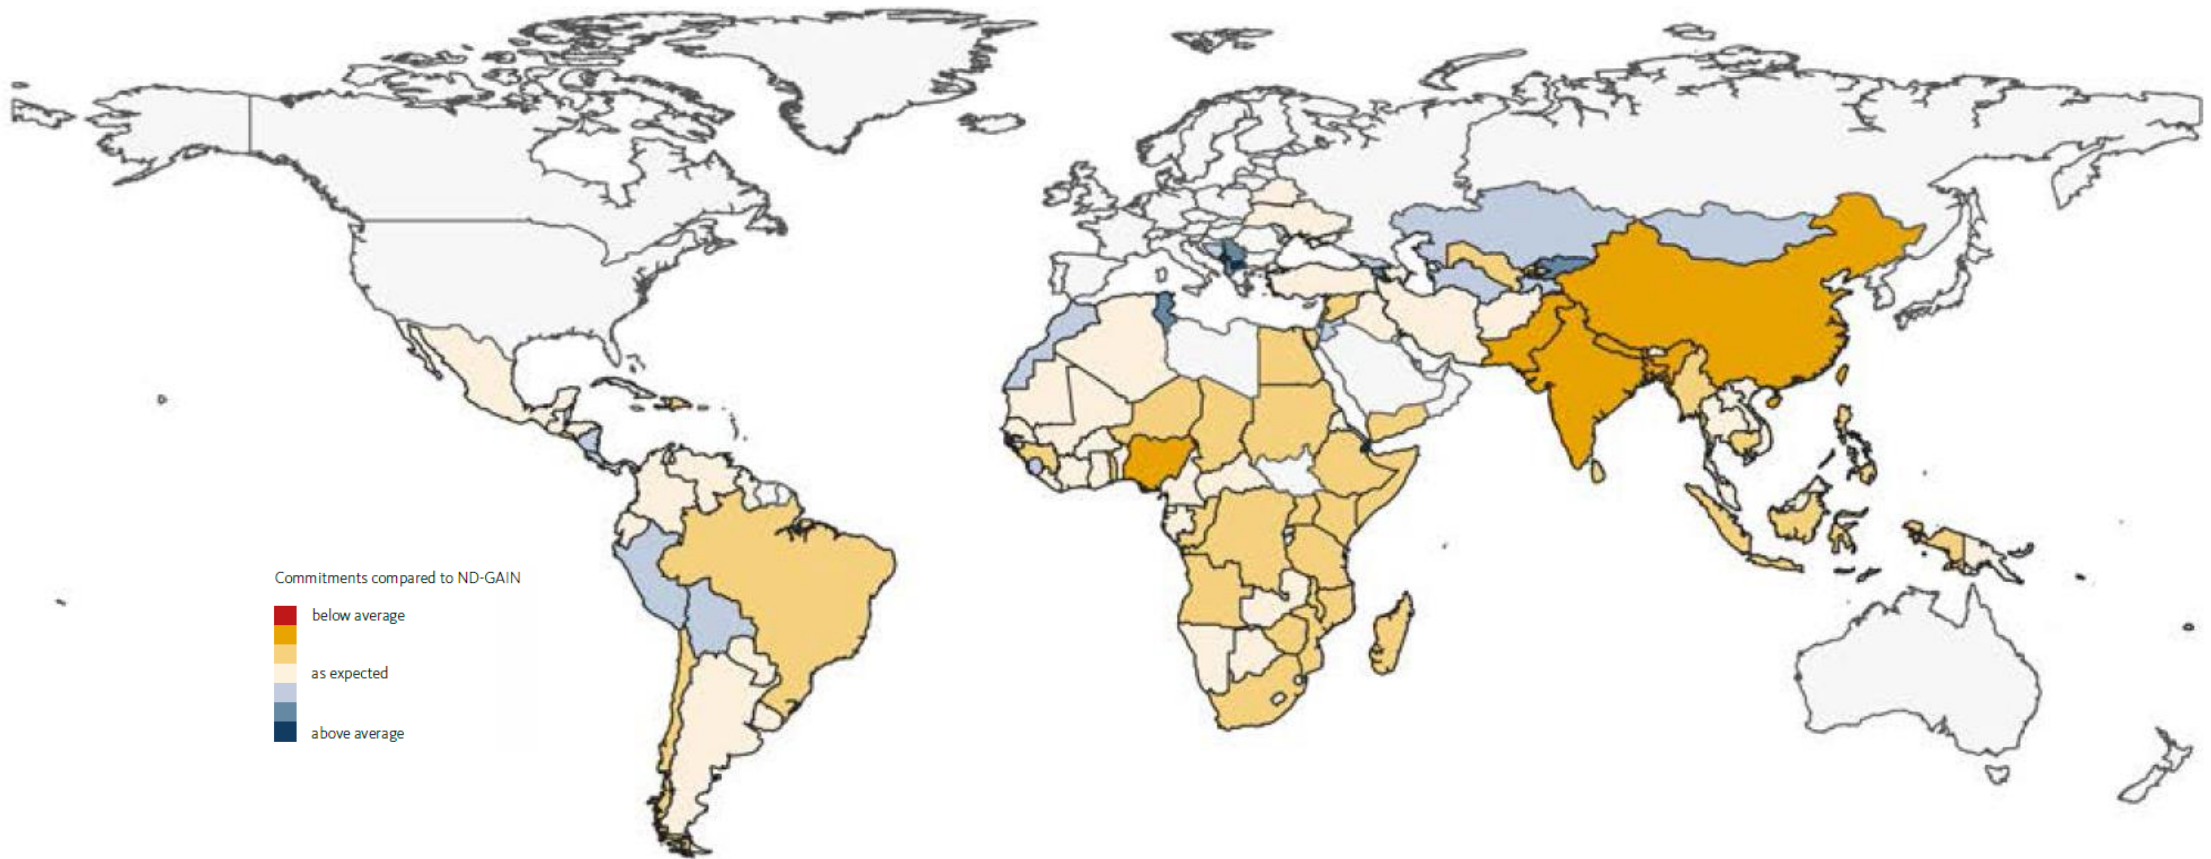

## Direct Support to National Determined Contributions (NDC) and Adaptation Plans (NAP) is effective

- Interventions with direct **Support to NDCs and NAP-Prozesses are mostly effective;**
- **Most countries have NAPs;** NDCs include increasingly **Adaptation components;**
- **Little direct support to LDCs;**
- Cooperation **mainly through TA;** FC-Instruments, like PBL, are rarely used

## Vulnerable countries do not receive more support

- **20% of commitments** go to **countries with high climate risks**, 60% goes to countries with a low risk;
- **SIDS** have **no increased probability** to receive German commitments (neither bi- nor multilateral).

# Conclusions
