Centre for Learning on Evaluation and Results (CLEAR)

CLEAR South Asia Center

Our mission is to strengthen monitoring and evaluation systems and build capacities for evidence-driven policymaking

GEI Global Evaluation Initiative

Core Implementing Partner of the Global Evaluation Initiative

Strengthening the Overall M&E Ecosystem

We work at the National Level with India's apex M&E institution and the country's nodal authority on the SDGs

- Technical advisory to the Development Monitoring and Evaluation Office (DMEO) on strengthening the country's outcome-output monitoring framework
- Support on the development of India's National Evaluation Policy

Supporting M&E at the Organizational Level

We work alongside multiple national and sub-national governments to strengthen M&E systems and build organizational M&E capacity

- For example, we work with the state Government of Tamil Nadu, to provide technical support on M&E and targeted engagements with departments
- We also supported the development of the State's Evaluation Guidelines

Building Capacities of Individual Policymakers

We build capacities of individual policymakers and develop specialized toolkits and frameworks to for better M&E and data systems

- At the National level we support DMEO in developing comprehensive action plans to strengthen admin data use
- At the Sub-National level, we help establish data policies, build capacities on M&E, and improve data systems.

Challenges in **geographical coverage, timeliness, disaggregation, capacity of national statistical systems, and availability of data on cross cutting goals** still remain areas of concern
